99	1015	(Delayed)	VR, Cpt Davis, BT441046, rkt lnc area used morning on 23 May 68. Area was loc by visual sightings and also by radar plot at time of firing at 0159H. Observation of the area revealed 2 back blast holes (indicating that 2 lncs were employed), one crew protection pit, one shallow ammo pit, one small electrical connection pit to rear, and one large command bunker to right falnk. The command bnkr was actually an old foundation hole for hut which was cleaned out and used for additional crew protection and to fire the rcts. Evidence of accurate artillery firing in area as evidenced by many craters, shell fragments and material left behind. Most items left behind were full of shell fragment holes. Items fd on site included 12 fuze cans, canvas fuze can holders, nose plugs, electrical plug-ins, and a long cylindrical shaped object resembling a stove-pipe. This item is most likely an abandoned rkt motor housing. Marking on it read: NAM BO KONG TH LOCD KZB V A 46 KG 106-6S031 7/67.
